| <b>Site Location:</b>              | West 15 <sup>th</sup> Street<br>Gary<br>Lake County |
| <b>VRP Site Number:</b>            | 6951101   |
| <b>Project Manager:</b>            | Damon Ridley  |
| <b>Date Application Received:</b>  | November, 1995                                      |
| <b>Date Project Completed:</b>     | August, 1998  |
| <b>Project Duration:</b>           | 33 months   |
| <b>Contaminant Group(s):</b>       | Petroleum, Semi-Volatile Organic Compounds (SVOCs)  |
| <b>Media Cleaned Up:</b>           | Soil, Groundwater                                   |
| <b>Cleanup Goals Achieved:</b>     | Tier II Nonresidential                              |
| <b>Deed/Land Use Restrictions:</b> | Nonresidential                                      |

**Project Description:** The site is the subject of a property transfer. As a part of the transaction, Phase I and Phase II site assessments were performed. Results of these investigations indicated detectable traces of petroleum hydrocarbons and phenols (SVOCs); however, the levels were below VRP's Tier II Nonresidential standards. Confirmatory sampling supported these results and the company's claim that no remediation was required.
